EDUCATION

UNIVERSITY OF LOUISIANA MONROE

Expected December 2023

Bachelor of Science – Computer Science (Honors) with a minor in Mathematics.

WORK EXPERIENCE

IBM Louisiana Economic Development Grant

August 2021 - Present

Software Developer

- Developed Web applications for small businesses to boost productivity in sales, inventory, billing, etc.
- Reduced inventory management cost by 35% by building a web application implementing REST APIs in Django, MySQL database for the app's backend, and HTML, CSS, Javascript, and React for the presentation layer.
- Updated old code bases to modern development standards, improving functionality.
- Led a team of 5 members and communicate with clients/management about project requirements and updates.

DXC Technology

June 2022 – August 2022

Technical Intern

- Reduced talent search time within the company by 60% by working collaboratively in an agile environment to design, test, develop, and deploy a cloud-native application.
- Designed a microservices solution architecture to monitor and log daily server tasks and reports to create business and forecast dashboards using Power BI, and embedded dashboards into a custom web application.
- Worked as Tech Lead/ Scrum Master in one of 4 sprints.
- Used Jira for user stories and Git for version control.

Department of CS, ULM

February 2022 – November 2022

Undergraduate Teaching Assistant

- Assume the role of a graduate student as a Junior Undergrad to assist a professor in facilitating and directing a daily two-hour class on Python and Java for about ~30 Freshman students.
- Handled questions and confusion about concepts and assignments related to object-oriented design, data structures, control structures, etc.

SKILLS

- **Languages:** Java, JavaScript, Python
- **Front-end:** HTML, CSS, Bootstrap, React.js, Figma
- **Back-end:** Django, Node.js, Express.js, Gunicorn, Nginx
- **Databases:** MongoDB, MySQL, PostgreSQL
- **OS Dev Environments:** Linux, Windows, macOS
- **Others:** Git, GitHub, Jira, Docker, AWS, Power BI, YAML

PROJECTS

Portfolio Website

nirajan-15.github.io/Nirajan-Sangraula

- Built a personal portfolio website using React.js, CSS, and Bootstrap to create the frontend part and EmailJS for email service.
- Deployed in GitHub pages and implemented GitHub Actions for CI/CD.

Blue Collar

[Github.com/Nirajan-15/Blue-Collar](https://github.com/Nirajan-15/Blue-Collar)

- Built a full-stack web application to allow users to find and post jobs easily.
- Utilized Django, PostgreSQL, Gunicorn, and Nginx for the app's backend, Docker for containerization, and HTML, CSS, and Bootstrap for the front-end layer.
